Committee on the Peaceful
Uses of Outer Space

Information furnished in conformity with the Convention on Registration of Objects Launched into Outer Space

Note verbale dated 7 June 1999 from the Permanent Mission of the Republic of Korea to the United Nations (Vienna) addressed to the Secretary-General

The Permanent Mission of the Republic of Korea to the United Nations (Vienna) presents its compliments to the Secretary-General of the United Nations and has the honour to transmit, in accordance with article IV of the Convention on Registration of Objects Launched into Outer Space,* information concerning the launching of the KITSAT-3 satellite (see annex).

* General Assembly resolution 3235 (XXIX), annex, of 12 November 1974.

V.99-85650 (E)

Annex

Registration data for space objects launched by the Republic of Korea in May 1999*

Name of space object:	KITSAT-3	
Date of launch:	26 May 1999	
Basic orbital characteristics:	Nodal period:	99.4 minutes
	Inclination:	98.3824 degrees
	Apogee:	738.607 kilometres
	Perigee:	717.640 kilometres

General function of space object:

Satellite engaged in experimental applications of space technology as follows:

Earth imaging;
High-energy particle experiment;
Electron temperature experiment;
Measurement of radiation effects on micro-electronics;
Investigation of the Earth magnetic field.

* The registration data are reproduced in the form in which they were received.
